DATE MAILED:

Please find below and/or attached an Office communication concerning this application or proceeding.

Commissioner for Patents

Mr. Thompson,

Multiple phone calls have been placed and no return call has been made, so this letter is being sent to clarify the outstanding issues with your application so the necessary changes can be made and the patent can be printed. The case is still in condition for allowance; however these issues need to be resolved before the patent can be printed.

- 1) A new set of drawings needs to be submitted. The current drawings on file have hole punch marks and stamps through some of the data within the drawings. A new set should be submitted without the stamped data and hole punch marks.
- 2) Figures 27 and 29 appear in the drawings, but not in the brief description. Either the Figures should be removed from the application or language should be inserted into the specification that briefly describes these Figures.
- 3) Figures 27E, 29C and 37B are in the brief description; however they do not exist within the drawings. The language within the specification regarding these drawings should be removed.
- 4) Two Figure 38's exist within the drawings. This issue should be resolved.

Please feel free to contact me directly at 571-270-3245 with any questions. If these issues can be resolved without a conversation, feel free to fax the changes to me directly at 571-270-4245. Again, these issues need to be resolved ASAP so the patent can be printed.

Thank you,
Mark Wendell
